

Desoutter

Industrial Tools

Desoutter is your single source of electric and pneumatic toolsolutions, covering a wide range of assembly and manufacturing processes in automotive, aeronautics, general industry and light industry sectors.

Founded in 1901 the company has always provided leading edge technology in the ergonomic design and cost efficient manufacturing of industrial, electric and assembly power tools and systems.

Our products provide unrivalled quality and advanced technology that stems from pioneering innovation, tireless research and inspired design and development in line with our customers requirements.

Our strength lies in the total integration of multi-cultural engineering experience, quality driven manufacturing expertise and customer orientated service.

Our goal is to exceed customer expectations in every aspect of quality, performance and value for money from a wide and varied product range and to be the complete source for all your manufacturing needs.

More Than Productivity
